HALF PRICE (Usually £180 & £230)

Book online today at www.rcgp.org.uk/courses

What the day includes

This is a full day interactive course packed with information, case studies, images, workshops and more.

The course will cover everything a GP and primary care staff needs for daily general practice as well as recent advances and red flags in allergies. We will look at general allergies, FGID's (functional gastro intestinal disorders), NICE/SIGN, red flags and guidelines throughout the day. We will also look at referral pathways and review a number of case scenarios that will help you in daily practice.

By the end of the day you will be able to deliver better clinical care and reduce referrals.

The course is suitable for

GPs at all levels wishing to learn more about allergies and give better patient care. The day is also suitable for other primary care clinical staff. All attendees are guaranteed to learn something from the day.

Topics include

- The allergic airway
- Food allergies
- Dietary management
- Urticaria
- BLS
- Emergency allergy management
- Interpreting allergy investigations
- Allergies effecting the skin

Lead Tutors

Dr Peter Saul is a GP in practice near Wrexham and clinical lead for the Countess of Chester Hospital Paediatric Allergy Service.

Dr James Mwenechanya: Consultant in Paediatric Allergy, Alder Hey Children's Hospital.

NUTRICIA
Early Life Nutrition

With over 100 years of caring for babies and 50 years of ongoing research into breastmilk and early life nutrition, Nutricia Early Life Nutrition combines science and experience to support parents, carers and healthcare professionals. At the heart of the company is the belief that long term health can be influenced by nutrition in the early years. The introduction of complementary foods presents a critical opportunity to establish taste acceptance and encourage healthy eating habits. <https://eln.nutricia.co.uk/>
